

NEW! EDSON[®] *Pro-Series* CARBON WHEEL

State of the art monocoque design and superb functionality

Edson's newest carbon yacht wheel is the lightest weight production carbon wheel on the market. Weighing less than 10lbs (4.5kg), the Edson ProSeries Carbon Wheel features a unique forked tri-spoke design, superb strength and fingertip sensitivity. Available from 36" (900mm) to 59" (1500mm), they are fabricated in carbon fibre using one piece monocoque construction — making them super strong and super light. The high gloss clear coat finish over carbon fabric weave yields a hi-tech look that compliments both a Grand Prix racer and a Superyacht.
