

Edson NavCom Tower System Installation Instructions

* Please refer to electronics manufacturer's guidelines to determine proper location of installation.

* Ensure surface of mounting location is clean.

* Place tower on mounting location and mark the four bolt hole locations—determine location for cable hole by intersecting lines between diagonal bolt hole locations.

* Drill out four bolt hole locations to 3/8" diameter—drill out cable hole to 1-1/2" diameter.

* CLEAN AROUND ALL HOLE LOCATIONS AGAIN.

* Fill four bolt holes with marine sealant and apply thin layer of sealant around outside diameter of cut cable hole on boat.

* Install tower—tighten bolts being careful not to over tighten and damage installation surfaces.

* Run cables and continue installation according to electronics manufacturer's instructions.
